email@nywd.org

Date: Monday, July 1, 2019, 10:44 AM PDT

Please provide me access to and copies of all communications and notes regarding communications between YWA and NYWD, relative to funding or potential funding for the Forbestown Ditch project planned to be undertaken by NYWD. This includes all communications whether that communication occurred via telephone, email or snail mail and meeting notes taken during communications. I am requesting this to cover April 2016 up to the present day. This would include any and all communications (including written letters delivered as either attachments to emails or via snail mail) signed by Donald Forguson, Eric Hansard and/or Jeff Maupin or anyone else representing or saying they represent NYWD and/or its board of directors.

I am informed that you possess, are maintaining and have used the records I am requesting. On August 2018, North Yuba Water District General Manager Maupin announced during the Board meeting that all engineering plans for the Forbestown Ditch were complete and that he had submitted them to YWA as a potential funding partner.

It shouldn't take you long to provide me with copies of the records I am requesting. I expect you to deliver copies to me via email attachment. I further expect a response to my records request within 10 days. If I don't receive a prompt response, then I will interpret that as a denial of my request and I will seek a judicial remedy.

Finally, if you withhold any of the records or information I am requesting for any reason, I expect you to prevent the deletion or destruction of any of the records I am requesting until I am satisfied with your response to my request.

If I do not receive a copy of the records described in the attached records requests, delivered to me as email attachments, by 1:00 PM on Thursday, July 11, 2019, then I will seek a judicial remedy.

Thank you,

Dr. Gretchen Flohr
